Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I.* Claims 1-20 drawn to ***an engine stop control apparatus*** classified in class 123, subclass 198DB, and including two patentably distinct species embodied by (1) claims 1-5 and (2) claims 6-20, one of which must be selected if Group I is elected for examination (no generic claim); and
- II.* Claims 21-27, drawn to ***a kinetic energy estimation apparatus***, classified in class 701, subclass 112.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions of group (I) and group (II) are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claim 8 is an evidence claim showing that the details of the kinetic energy estimation apparatus are not required for patentability

Because these inventions are distinct for the reasons given above and the search required for group (I) is not required for group (II), restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3747

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
